

OLM Real Estate

- an ICO solving the Swedish housing crisis

Sweden faces a housing shortage of up to 700 000 homes by 2025, despite being of the most secure jurisdictions to invest in. The purpose of our ICO is to secure funding for our vision – constructing 15 000 apartments before 2023 in Sweden. Our houses are environmentally and socially conscious, with affordable rent and green technologies. Our token utilizes the Ethereum blockchain and smart contracts to achieve the highest standards of security and trust, ensuring that our investors can take part in our profits.

How will we build?

Innovative construction techniques allow houses to be built quickly

Qualifies for highest level eco-certificate

Homepage that allows effortless interaction with tenants

Why invest in us?

50% of taxed profits go to token holders every year – forever

50% of taxed profits reinvested

A strong commitment to transparency towards our investors

Who are we?

We have decades of experience in the construction industry, both on-site and upper-level management

Legal, IT, crypto and Blockchain professionals inhouse
